Padraig Lavery

Backend & DevOps Software Engineer – C# / .NET, CI/CD, Cloud

Belfast, Northern Ireland | LinkedIn | GitHub

PROFILE

Backend software engineer with 4+ years building and running services for UK and Middle East banking clients in C#/.NET and Node.js, with hands-on CI/CD, Kubernetes and infrastructure-as-code work. Comfortable on both sides of the backend–DevOps line: writing the service, building the pipeline that ships it, and fixing it in production.

EXPERIENCE

Developer | Reward, Belfast | June 2022 – Present

Backend services and APIs

- Led the technical migration of email templates onto dedicated brand domains across four banking brands (MJML, .NET Core), preserving deliverability.
- Hardened authentication and account services: removed stack traces and SQL details from error responses and standardised input validation across partner microservices.
- Designed and implemented audit logging of staff access to customer accounts across UK and Middle East bank portals.
- Redesigned a month-end transactional invoicing batch with per-partner error isolation, explicit timeouts and safe retry/reconciliation.

CI/CD and DevOps

- Led a cross-team initiative to enable automated API testing and stabilised GitHub Actions CI, including fixing a GitHub App token authentication issue that had been blocking test runs.
- Built the CI/CD pipeline for a UI Builder service as part of an internal AI investigation project.
- Resolved a customer-facing outage in a Kubernetes/Istio ingress setup and corrected the Helm deployment templates so it could not recur.
- Automated scheduled file processing with EventBridge, Lambda and Fargate, removing manual triggers; audited 100+ S3 buckets and applied lifecycle policies.
- Planned testing for AWS SDK v3 and Node 22 runtime upgrades across repositories and bank deployments, remediating critical Snyk-flagged vulnerabilities for PCI DSS.

Team

- Wrote runbooks and SOPs for the production services team; mentored four new starters and run the team's retrospectives.

Intern Software Engineer | Flexera, Belfast | May 2020 – April 2021

- Developed a cloud-cost web API using Go, Docker, Kubernetes and Git.

SKILLS

- **Back end:** C#, .NET / .NET Core, Node.js, microservices, OpenAPI/Swagger, GraphQL
- **CI/CD and infrastructure:** GitHub Actions, Terraform, Kubernetes, Helm, Istio, Docker
- **Cloud:** AWS (Lambda, Fargate, S3, EventBridge)
- **Data:** PostgreSQL, MongoDB, SQL
- **Practices:** production incident response, runbooks, automated testing, security remediation (Snyk, OWASP)

EDUCATION AND CERTIFICATIONS

- BSc (Hons) Computer Science, 2:1 – Ulster University, Belfast, June 2022
- AWS Certified Developer – Associate; AWS Certified Cloud Practitioner
- AWS Certified AI Practitioner – preparing, exam November 2026
