Padraig Lavery

Full Stack Software Engineer – C# / .NET, Angular, AWS

Belfast, Northern Ireland | LinkedIn | GitHub

PROFILE

Full stack software engineer with 4+ years building high-volume, security-sensitive systems for UK and Middle East banking clients with Angular, .NET/C#, Node.js and PostgreSQL on AWS and Kubernetes. Delivers features end to end, from back-end services and APIs to accessible front ends, and keeps them healthy in production. Leads cross-team work, mentors new starters and runs team retrospectives.

EXPERIENCE

Developer | Reward, Belfast | June 2022 – Present

Full stack features

- Led the technical migration of email templates onto dedicated brand domains across four banking brands (MJML, .NET Core), preserving deliverability.
- Built full stack features across web and mobile, including a secure e-code resend flow with audit-logged resends and multi-bank email routing, and targeted customer redemption pop-ups with deep-linking.
- Fixed WCAG colour-contrast failures, raising contrast from 1.7:1 to 4.5:1.
- Designed and implemented audit logging of staff access to customer accounts across UK and Middle East bank portals.

Back-end quality and security

- Hardened authentication and account services: removed stack traces and SQL details from error responses and standardised input validation across partner microservices.
- Led a cross-team initiative for automated API and feature testing: request validation, shared error handling, safe test-data cleanup endpoints, OpenAPI/Swagger documentation, unit tests and a stabilised GitHub Actions CI pipeline.
- Remediated critical Snyk-flagged vulnerabilities for PCI DSS compliance during planned AWS SDK v3 and Node 22 upgrades.

Production

- Eliminated recurring daily out-of-memory crashes in a high-volume ingestion service by loading caches once per batch instead of per file.
- Redesigned a month-end invoicing batch with per-partner error isolation, explicit timeouts and safe retry/reconciliation.
- Mentored and onboarded four new starters; run the team's retrospectives and author technical guides.

Intern Software Engineer | Flexera, Belfast | May 2020 – April 2021

- Developed a cloud-cost web API in a small agile team using Go, Docker, Kubernetes and Git.

PROJECTS

AI-Based Credit Card Fraud Detection (final year project) | Angular, Flask, GraphQL, Docker, Kubernetes, AWS SageMaker

- End-to-end web app flagging irregular credit card transactions, built as Docker/Kubernetes microservices on AWS with a model trained in R and Python.

SKILLS

- **Back end:** C#, .NET / .NET Core, Node.js, microservices, REST and GraphQL APIs, OpenAPI/Swagger
- **Front end:** Angular, HTML/CSS, MJML, WCAG accessibility
- **Data:** PostgreSQL, MongoDB, SQL
- **Cloud and delivery:** AWS (Lambda, Fargate, S3, EventBridge), Kubernetes, Helm, Docker, Terraform, GitHub Actions
- **Practices:** automated testing, security remediation (Snyk, OWASP), production incident response, Agile/Scrum

EDUCATION AND CERTIFICATIONS

- BSc (Hons) Computer Science, 2:1 – Ulster University, Belfast, June 2022
- AWS Certified Developer – Associate; AWS Certified Cloud Practitioner

- AWS Certified AI Practitioner – preparing, exam November 2026
